ABOUT ME

I am a dedicated Android Developer with hands-on experience in building scalable, user-focused mobile applications using Kotlin and Java. I specialize in integrating RESTful APIs, implementing secure authentication, and developing feature-rich applications with clean architecture and modern UI components. I have strong experience working with Laravel backends, Retrofit and custom UI components, and third-party services like Stripe for payments. Passionate about writing clean, maintainable code and continuously learning new technologies, I thrive in collaborative environments and focus on delivering high-quality, performance-driven mobile solutions.
